

Project Title

School Management System Using PHP & MySQL Database

1. Introduction

A School Management System is a web-based application that helps schools manage their daily activities digitally. It reduces paperwork and allows administrators, teachers, students, and parents to access important information easily. This project will be developed using PHP for the backend and MySQL as the database.

2. Problem Statement

Many schools still rely on manual record-keeping for student information, attendance, results, and fee management. This process is time-consuming, prone to errors, and difficult to maintain. A computerized management system can improve efficiency and data accuracy.

3. Project Objectives

- Develop a user-friendly school management system.
- Store student and teacher information securely.
- Manage student attendance.
- Record and publish examination results.
- Manage class and subject information.
- Generate simple reports.
- Reduce manual paperwork and improve efficiency.

4. Scope of the Project

The system will provide the following features:

- User Login (Admin, Teacher, Student)
- Student Management
- Teacher Management
- Class Management
- Subject Management
- Attendance Management
- Examination & Result Management
- Fee Management (Basic)
- Notice Board
- Profile Management
- Report Generation

5. Software Requirements

- PHP
- MySQL Database
- HTML
- CSS
- JavaScript
- Bootstrap
- XAMPP Server
- Visual Studio Code

6. Hardware Requirements

- Windows 10/11 Computer
- Minimum 4 GB RAM

- Intel Core i3 Processor or Higher
- 500 MB Free Disk Space

7. Methodology

The project will follow these steps:

1. Requirement Analysis
2. System Design
3. Database Design
4. Interface Design
5. Coding Using PHP
6. Database Integration with MySQL
7. Testing and Bug Fixing
8. Deployment on Local Server

8. Expected Outcomes

After completing the project, the system will:

- Maintain school records digitally.
- Reduce administrative workload.
- Improve data accuracy.
- Provide quick access to information.
- Generate reports efficiently.

9. Future Improvements

- Online Fee Payment

- SMS & Email Notifications
- Parent Portal
- Mobile Application
- Online Class Integration
- AI-based Student Performance Analysis

10. Conclusion

The School Management System will provide a simple, efficient, and reliable solution for managing school activities. It will replace manual record-keeping with a secure digital platform, making school administration easier and more organized.
